Lakeland Fly Fishing components are constructed of only the highest quality materials and standards. Lakeland's brass beads, cones, and fly tying eyes are machined from solid brass for a superior quality finish and lasting durability to with-stand the demands of fly fishing. Adding Lakeland components can easily enhance your existing tackle line.

Lakeland spinner blades are available in a variety of styles such as Colorado, Colorado Deep Cup, Willowleaf, Indiana, Magnum Willow, Magnum Indiana, Magnum, French, and In-line. Extensive pattern selection (plain, fluted, diamond, hex, scale, rib) and 6 premium plate finishes (bright nickel, 24 karat gold, silver & lacquer, black/nickel & lacquer, copper & lacquer, 50/50 nickel/gold) will add value to any lure. Lakeland's special plating process creates a highly reflective finish, and produces a brilliant flash for added fish attraction.

At Lakeland, manufacturing the finest quality spinner blades, casting spoons and trolling flutter spoons for the fishing tackle industry is our only business. Lakeland is one of the largest manufacturers and continues to offer more choices of size, pattern, shape, finish, paint, and custom application than any other lure component manufacturer.

Lakeland customers expect the best service in the industry and we exceed their expectations with continued innovation and service. Be sure to contact Lakeland to meet your fishing tackle component needs.
