

Great Fishing with Lakeland Components
More Finishes • More Sizes • More Choices

Lakeland's Enhanced Chip Resistant Finish Offers More Durable, Longer Lasting Colors for Premium Fishing Tackle

Lakeland's Enhanced Chip Resistant Finish Offers Extensive Fishing Tackle Alternatives:

- Resistant to chipping, scratching, and color fading
- Colors stay brighter and vibrant longer
- Environmentally friendly by eliminating chips and scratches
- Available on spinner blades, spoons, and components
- Extensive variety of color and transparent finishes
- Leading edge finishes to meet your unique requirements

Lakeland's Enhanced Chip Resistant Finish is a special finish that provides increased durability for fishing tackle. Enhanced Chip Resistant Finish can be applied to spinner blades, casting spoons, trolling flutter spoons, and other fishing tackle components. This unique finish is chip and scratch resistant. Colors stay brighter and vibrant longer. Enhanced Chip Resistant Finish adds more value to your fishing tackle and is friendly to the environment.

At Lakeland, manufacturing the finest quality spinner blades, casting spoons and trolling flutter spoons for the fishing tackle industry is our only business. Lakeland is one of the largest manufacturers and continues to offer more choices of size, pattern, shape, finish, paint, and custom application than any other lure component manufacturer.

Lakeland customers expect the best service in the industry and we exceed their expectations with continued innovation and service. Be sure to contact Lakeland to meet your fishing tackle component needs.
