## ***Matte Silver Finish***

### ***Lakeland's New Matte Silver Finish for Spinner Blades, Spoons, and Components***

If you are looking for an alternative to a traditional mirror finish, then the Lakeland Matte Silver Finish is the key. When you need a component to deliver a flash in deep or dark waters, look to the matte silver finish. Lakeland's matte silver finish will retain the reflective qualities more than a premium (mirror) finish and out flash a nickel plated component. The non-glossy (reduced shine) finish has a rich evenly colored appearance.

At Lakeland, manufacturing the finest quality spinner blades, casting spoons and trolling flutter spoons for the fishing tackle industry is our only business. Lakeland is one of the largest manufacturers and continues to offer more choices of size, pattern, shape, finish, paint, and custom application than any other lure component manufacturer.

Lakeland customers expect the best service in the industry and we exceed their expectations with a commitment of continued innovation. Be sure to contact Lakeland to meet your fishing tackle component needs.
